

UIC Instrumentation

UIC Instrumentation (Pty) Ltd is an Instrumentation and allied products sales company offering local distribution, sales and support for a range of Instrument and Electrical products. UIC Instrumentation in addition to offering the normal sales service associated with similar sales companies, which support sales representatives promoting and selling this equipment, has the additional services in belonging to the UIC Group which make UIC Instrumentation unique.

UIC Instrumentation has vast resource base at its disposal, which the traditional "Sales and Marketing" company cannot offer. These services

include the following:-

- Systems Design and Engineering:- Resources including Highly Qualified Instrumentation and Electrical Engineers, Engineering Tools (ACAD, ETAP, Autoplant, InTools design packages) and Engineering Systems.
- Installation of Equipment:- Construction teams, Tools and equipment to tackle projects of any size.
- Commissioning services:- Pool of Commissioning Engineers, Technicians and Artisans and tried and tested Quality Control Systems and Procedures.
- Backup after Sales Services including calibration, regular maintenance, fault finding and repairs of equipment and systems.
- Total Turnkey solutions.

UIC has a long standing history in the area of Project Management, Design, Engineering and installation, and is well recognised in industry for its high standards of project execution.

UIC operates from a well structured and disciplined Engineering environment, with specialised support resources at different levels, current engineering tools and systems and Engineering Guidelines and Methodology ensuring projects are well engineered and accurately documented for implementation and future maintenance.

UIC Instrumentation has sub-agents appointed in various regions in SA and will over time establish agencies in all major

centres in South Africa for its exclusive product lines. Currently sub agencies exist in Bloemfontein, Botswana, Eastern Cape, Gauteng and surrounding areas, Mozambique, Rustenburg, and Secunda. It is UIC's intention to spread this range of agencies and operational regions throughout South Africa and the African continent.

UIC Instrumentation has agency agreements for a range of products, some exclusive agencies for certain regions whilst others are shared agencies. The initial agencies include the following:

The range of Products which UIC promotes, includes the following:-

Mainline bulk general instrumentation for the general process control industry including pressure, temperature, flow,

Speciality ranges of Instrumentation including:-

- + Gas Detection
- + Telemetry
- + Signal Conditioning
- + Refractive Index Densitometers
- + Dosing Pumps
- + PH, Conductivity
- + Flow – V Cone,
- + Level RF Admittance
- + Portable Temperature recording.

Audio Instrument equipment including:-

- + Microphones
- + Input Conditioning
- + Mixing Consoles
- + Amplifiers
- + Speaker Systems
- + Audio Processors
- + Stands
- + Cases
